

SUPRIYA VEERAVALLI

College Graduate

Mobile: +91 8333934377

Email: supriyaveeravalli26@gmail.com

LinkedIn: LinkedIn/in/Supriya

Location: Hyderabad, India

CAREER OBJECTIVE

Seeking an entry-level software engineering role to apply foundational programming skills and theoretical knowledge in software development for contributing to innovative projects.

EDUCATION

Bachelor of Technology in Electronics and Communication Engineering August 2018 – September 2022
Sri Vasavi Institute of Engineering and Technology CGPA – 6.9

Board of Intermediate Education April 2016 – May 2018
RK Junior College CGPA – 9.7

TECHNICAL SKILLS

- **Programming Languages:** Python, C#
- **Frameworks & Technologies:** .NET, asp.NET
- **Database Management:** SQL
- **Software Tools:** MS Excel
- **Operating Systems:** Windows
- **Version Control:** Git

PROJECTS

Free Space Optical Communication under Different Weather Conditions June 2022 – September 2022

- Analysed Free Space Optical Communication performance in diverse weather conditions, demonstrating decrease in transmission efficiency during heavy rainfall.
- Evaluated LOS technology efficacy across varied weather scenarios, noting a 20% reduction in signal quality during dense fog.
- Investigated the impact of different weather phenomena, indicating decrease in transmission stability in snowy conditions.
- Assessed the resilience of photonic communication systems, showcasing decline in reliability during thunderstorms.
- Examined adaptability and reliability of laser-based communication, highlighting a 30% decrease in performance during sandstorms.
- Tested photodetector mechanisms, revealing a 12% reduction in accuracy during instances of haze or mist.

Automated Data Analysis Tool Using Python January 2022 – February 2022

- Planned an automated data analysis tool using Python, reducing manual analysis time by 60%.
- Implemented statistical algorithms, achieving accuracy rate in predictive analysis.
- Established a Python script to process large datasets, enhancing data processing speed using optimized algorithms.
- Designed and executed data visualization modules, resulting improvement in presenting complex data insights.
- Integrated machine learning models within the tool, yielding a 70% reduction in error rates during anomaly detection and pattern recognition.

CERTIFICATIONS

- Completed Python certification – DHAPPS
- Achieved Linux certification – FLM
